## Das Unternehmen The Company

---

### Im Bereich Automobiltechnologie steht Sicherheit an oberster Stelle.

Sicherheit in der Logistik ist die Grundlage erfolgreicher Produktion. Sicherheit in der Technik ist die Basis für einen erfolgreichen Vertrieb. Und das reibungslose Zusammenspiel von Lieferanten und Kunden gibt Sicherheit im täglichen Geschäft.

Doch wie sicher können Sie sich sein?

Kunden der HÜCO electronic GmbH haben hier ihren entscheidenden Vorteil entdeckt; ein Produkt auf das man sich verlässt, und einen Lieferanten, dem man vertraut. Unser guter Ruf ist unser größtes Kapital - und der ist uns etwas wert. Produktionsbegleitende Qualitätssicherung und absolute Liefertreue sichern unseren Erfolg und damit den Erfolg unserer Kunden. Darum ist die HÜCO electronic GmbH langjähriger Partner der Automobilindustrie.

75% Exportanteil und ein ständig wachsender Anteil am Weltmarkt bedeuten Verantwortung, und der ist sich die HÜCO electronic GmbH bewusst.

### Vertrauen fordert Verantwortung.

Die Herstellung hochwertiger Ersatzteile für den internationalen Markt für Fahrzeugelektronik ist die Aufgabe, der HÜCO electronic sich seit über 25 Jahren erfolgreich stellt. Ob Regler oder Gleichrichter, Glühzeitrelais oder Drosselklappensensoren, Zündmodule, Zündspulen und Luftmassenmesser der HÜCO electronic GmbH sind immer eine sichere Alternative.

Und dafür tun wir etwas. HÜCO electronic ist Mitglied im VDA (Verband der Automobilindustrie), APRA (Automotive Parts Rebuilders Association) und ZVEI (Zentralverband Elektronik und Elektroindustrie) und seit Jahren zertifiziert nach DIN EN ISO 9001: 2000 Hueco electronic (India) ist nach DIN ISO TS 16949:2002 zertifiziert Denn als einer der größten internationalen Hersteller im Aftermarket von Ersatzteilen für europäische und japanische Fahrzeuge liegt unser besonderes Augenmerk auf der Qualität der HÜCO Produkte und der Qualität des HÜCO Kundenservice.

### Verantwortung verlangt Qualität.

Mit 8500m<sup>2</sup> Produktionsfläche und 2500m<sup>2</sup> Bürofläche für Konstruktion, Entwicklung und Administration ist HÜCO electronic für einen stetigen Expansionskurs auch in der Zukunft bestens gerüstet. Rund 130 hochqualifizierte Mitarbeiter im In- und Ausland schaffen Produkte, Service und Qualität und tragen damit den Erfolg von HÜCO electronic. Denn unser Erfolg ist der Erfolg unserer Kunden.

### Qualität schenkt Erfolg.

#### Hinweis

Die in den HÜCO Katalogen, CD-Rom und im Internet angegebenen OE Namen und Nummern dienen ausschließlich dem Vergleich. HÜCO übernimmt keine Garantie für die Richtigkeit der angegebenen Nummern und Anwendungen.

### HÜCO - at the forefront of automotive technology.

Here at HÜCO we strive to deliver the best possible service to our customers. We realise that reliability in the logistics and in our products combined with transparent cooperation between ourselves and the customer gives certainty in your daily business.

But how can you be sure?

Existing customers of HÜCO electronic GmbH have already discovered this important advantage; a product you can rely on and a supplier you can trust. Our reputation is our most important asset and we value it greatly. Stringent quality control throughout the production process and fulfilment of delivery times ensure our success and that of our customers.

This is what has established HÜCO as a premier partner in the automotive industry since our foundation.

HÜCO exports over 75% of its production and plays an important role in the constantly evolving world market, a responsibility that HÜCO is acutely aware of.

### Confidence requires responsibility.

HÜCO has been a successful manufacturer of high-quality spare parts for the international automotive market for more than 25 years. Regulators, rectifiers, relays, ignition modules, ignitions coils, air flow meters or throttle-position sensors from HÜCO electronic GmbH are always a reliable option.

And this is what we are working towards. HÜCO electronic is a member of the VDA (Association of the Automotive Industry), APRA (Automotive Parts Rebuilders Association) and ZVEI (Central Association for Electronics and the Electronic Industry) and has been certified to DIN EN ISO 9001: 2000 for many years. Hueco electronic (India) Pvt. Ltd. is certified according to DIN ISO TS 16949:2002

As one of the leading international manufacturers for the Aftermarket of spare parts for European and Japanese vehicles we attach great importance to the quality of HÜCO products and HÜCO customer service.

### Responsibility requires quality.

With a production area of 8500m<sup>2</sup> and 2500m<sup>2</sup> area for design, development and administration, HÜCO electronic is well prepared for continuous future expansion. There are approximately 130 highly qualified and skilled employees at home and abroad who create products, service and quality and contribute to the success of HÜCO electronic GmbH. Our success is the success of our customers.

### Quality brings success.

#### Disclaimer

The information provided in the HÜCO catalogue, CD-Rom and in the Internet is for reference only. HÜCO assumes no responsibility for the correctness of the indicated OE names and numbers and applications.

Photos and drawings do not always correspond to the descriptions they are assigned to. Subject to technical modification.

**Informationssysteme**

HÜCO hält eine Vielzahl von Informationssystemen für Sie bereit, mit deren Hilfe Sie sowohl einen Überblick über das komplette Produktprogramm, als auch über produktspezifische Informationen erhalten.

**Der direkte Draht**

Ein Anruf, eine Anfrage per Fax oder eMail genügen und Sie bekommen schnellstmöglich eine Antwort auf alle Fragen zu den Liefermöglichkeiten oder den HÜCO Produkten.

**Internet**

Schnell und immer aktuell - so stellt sich die HÜCO-Homepage der HÜCO Gruppe dar. Wir informieren Sie über unsere Produkte und das Unternehmen. Im Bereich der Online Kataloge haben wir umfangreiche Suchmöglichkeiten für Sie implementiert.

**Printmedien**

Verschiedene Kataloge und Flyer sowie eine CD-ROM, geben Ihnen einen Überblick über die unterschiedlichen Produktlinien im Bereich der Fahrzeugelektronik. Zudem finden Sie unsere Produkte auf dem Teccat online Katalog unter [www.teccat.de](http://www.teccat.de)

**Information systems**

HÜCO offers you a variety of information systems that give you not only an overview of our complete product range but also contain specific information on our products.

**Direct line**

Just give us a call, send us a fax or email and we will respond to your queries regarding the HÜCO product range or delivery times as quickly as possible.

**Internet**

Fast and up-to-date - this presents our homepage . We inform you about our products and the company. In the area of the online catalogues we implemented extensive search options for you.

**Promotional Material**

A variety of catalogues and brochures as well as a CD-ROM provide information about the different product lines in the automotive electronic range. You can also find our Products at Teccat online catalogue: [www.teccat.de](http://www.teccat.de)

# Produkt Informationen zu Zündmodulen und Luftmassenmesser

## Product Infos for Ignition Modules and Air Flow Meters

### HÜCO Zündmodule

Zündmodule sind ein integrativer Teil des Motormanagements. Dieses besteht aus mindestens den Hall- bzw. Impulsgebern, dem Zündmodul, der Zündspule und den Zündkerzen. Bei Fehlern im Zündmodul kommt es zu Fehlzündungen, „Stottern“ des Motors oder aber ein Totalausfall. In diesen Fällen müssen sie getauscht werden. Eine Reparatur ist i.d.R. nicht möglich, da die Teile zum einen sehr komplex sind, andererseits meistens mit einer Vergussmasse vergossen sind, so dass die Komponenten nicht frei zugänglich sind.

Zündmodule können grob in die beiden Untergruppen „Endstufe“ und „Pick-up/Hall“ Systeme unterteilt werden:

#### A) Zündendstufe

Die Zündendstufe ist mit mehreren internen Leistungstransistoren aufgebaut. Diese schalten den Primärstrom, der durch die Zündspule fließt. Sie begrenzen sowohl den Primärstrom als auch die Primärspannung, um Schäden an der Zündanlage zu vermeiden.

Zündendstufen sind entweder in der „Black-Box“ mit eingebaut, oder sind frei (meist in Kombination mit einer Zündspule) im Motorraum untergebracht. Dabei wirken starke Temperaturunterschiede, Feuchtigkeit und starke Vibrationen auf das Modul ein. Durch die hohen Ströme und der daraus resultierenden Verlustleistung werden die Bauteile innerhalb des Zündmoduls sehr heiß. Die entsprechende Hitze muß über Kühlbleche bzw. Kühlkörper schnell abgeleitet werden.

#### B) Pick-up und Hallsysteme

Die Pick-up und Hall Systeme bekommen ihr Input Signal von einem sogenannten Hallgeber oder einem Impulsgeber. Sie arbeiten das Signal intern auf und leiten es dann an die eingebaute bzw. externe Endstufe weiter.

Zündmodule sind sehr komplexe, empfindliche elektronische Geräte, die durch starke interne Belastungen sowie nicht optimale äußere Einflüsse relativ hohen Ausfallraten unterliegen. Im folgenden Teil sollen einige Ausfallursachen genannt werden:

#### 1. Falsche Referenz (zu OE)/falsche Umschlüsselung

Die häufigste Ausfallursache für ein Ersatzteil ist die falsche Umschlüsselung eines Teiles. Dies ist zum einen auf einfache Fehler wie Zahlendreher zurückzuführen. Andererseits sehen viele Teile extern gleich aus, sind aber intern anders aufgebaut. Werden diese Teiledann testhalber eingesetzt, werden sie durch die nicht auf sie abgestimmten Impulse zerstört. Im schlechtesten Fall können auch andere Teile der Zündanlage in Mitleidenschaft gezogen werden.

#### 2. Hohe Spannungsspitzen im Bordnetz, hervorgerufen durch:

Induktive Verbraucher  
Kabelbruch, evtl. dadurch verursachter Kurzschluß,  
Massefehler etc.  
Mangelhafte Kontaktierung z.B. der B+ Schelle  
E-Motoren (elektrisches Schiebedach, Fensterheber, Anlasser etc.)  
Überbrückung bei Starthilfe etc.  
Spannungsspitzen können die eingangsseitigen Komponenten eines Zündmoduls beschädigen. Das Modul ist zwar gegen solche eventuellen Spitzen geschützt, kann jedoch trotzdem in Extremsituationen ausfallen.

#### 3. Mechanische Einwirkung

Montage fehlerhaft (Drehmomente). Sollten bei einer routinemäßigen Kontrolle oder dem Ersatz eines Zündmoduls die Befestigungsschrauben zu stark angezogen werden, so könnten die innen liegenden Hybride und/oder Komponenten beschädigt werden. Es ist deshalb darauf zu achten, die Schrauben nicht zu fest anzuziehen.  
externe mechanische Einwirkungen (Feuchtigkeit, abnormale Vibrationen etc.). In der Regel wird vom Fahrzeughersteller ein geschützter Ort für den Einbau gewählt. Aber z.B. durch Steinschlag etc.

### HÜCO Ignition modules

Ignition modules, as you are probably aware, form an extremely critical integral part of the Motormanagement System, consisting at least of hall systems respectively transmitters, ignition modules, ignition coils and ignition plugs. In some cases, if the ignition module does not function correctly, causing the engine to misfire and toxic emissions to increase, a complete breakdown of the engine management system could result. If this happens the ignition module must be replaced. A repair of the module itself is virtually impossible, as the components are extremely complex, not to mention that all these components are encapsulated within epoxy resin to prevent contamination from the environment.

Ignition modules can be subdivided into two groups, „amplifiers“ and „pick-ups / hall systems“:

#### A) Amplifiers

The amplifier consists of different internal power transistors switching the primary current feeding the ignition coil. Transistors limit both the primary current as well as the primary voltage in order to avoid defects of the ignition system.

Amplifiers are either an integral part of the the „ECU „ or alternatively, mounted within the engine compartment (mostly in combination with an ignition coil). In this location, the module must withstand enormous variations in temperature, vibration and humidity, with under bonnet temperatures reaching 50 degrees centigrade easily. Coupled with the heat naturally generated by the module itself, it must withstand this hostile environment and still perform to specifications.

The resulting heat has to be carried off quickly by cooling sheets.

#### B) Pick-up and hall systems

This type of pick-up based on the hall system receiving input signals from a transmitter. They recover the signal on an internal basis and then forward it to the internal amplifier or external amplifier.

Ignition modules are very complex, sensitive electronical components, which often fail due to enormous internal load rates and certain external influences. Several reasons for these failures are as follows:

#### 1. Incorrect cross reference (OE) /incorrect Application

Often the failure of a spare part is due to an incorrect cross reference. On the one hand there might be mistakes in the reference number itself and on the other hand many spare parts have the same configuration with different electrical characteristics within the circuit. If these parts are used on the wrong vehicle, they will be destroyed by the impulses, which do not correspond to them. In the worst case, this can also affect other parts of the ignition system causing permanent damage.

#### 2. High voltage peaks in mains power supply due to:

Inductive consumers (e.g. ignition coils, motors etc.)  
Cable break, perhaps results in a short-circuit, failure in ground connection  
Insufficient contact of e.g. B+ clamp  
Electronic motors (electrical sliding roof, electrically operated windows, starters etc.  
bridging (using jump leads) when giving starting assistance etc.  
Voltage peaks can damage the electrical components of the ignition module. Even though the module is protected against those peaks, it can nevertheless happen under extreme situations.

#### 3. Mechanical influence

Incorrect installation (engine torque). The internal hybrids and/or components can be damaged, if the clamping bolts are tightened too strongly when replacing an ignition module or having a routine inspection. For this reason, it has to be observed that the clamps must be at the correct torque.  
External mechanical influence such as humidity or abnormal vibrations etc.  
Most vehicle manufacturers safeguard that these components are placed in strategic under-bonnet locations to ensure the protection of

## Produkt Informationen zu Zündmodulen und Luftmassenmesser

### Product Infos for Ignition Modules and Air Flow Meters

---

kann es zu Schäden am Gehäuse, Stecker etc. kommen, was dann das Eindringen von Feuchtigkeit etc. bedingen könnte. Mit zunehmendem Alter des Fahrzeuges nehmen Vibrationen zu. Dies kann zu Verbindungsschäden führen.

#### 4. Temperaturen außerhalb der Spezifikation

Defektes Kühlsystem. Durch einen Ausfall oder eine teilweise geringere Leistung des Kühlsystems kann es temporär zu einer starken Hitzeeinwirkung des Moduls kommen. Zusätzlich zu der intern entstehenden Wärme kann dies zur Zerstörung des Moduls führen.

Falscher Einbau (Wärmeabfuhr). Bei einigen Modulen muss darauf geachtet werden, dass die mitgelieferte Wärmeleitpaste unbedingt zwischen das Modul und das Gegenstück (i.d.R. ein Blech) gestrichen wird. Sie optimiert den Wärmeabfluss und erhöht somit die Lebensdauer eines Zündmoduls.

Falscher Einsatzort (externe Wärmequelle). Das Modul könnte vom OE Hersteller an einer nicht geeigneten Stelle platziert worden sein oder aber bei einer eventuellen Reparatur an falscher Stelle montiert sein.

#### 5. Andere Fehlerursachen

Geber defekt (Verteiler)

Impulsgeber

Steuergerät

Zündkerzen

Zündkabel

Alle diese Ursachen können das gleiche Erscheinungsbild wie ein defektes Zündmodul aufweisen. Sollten sie defekt sein, aber nur ein neues Zündmodul eingesetzt werden, kann es passieren, dass auch das neue Teil sofort durch den anderen Defekt wieder zerstört wird.

#### 6. Fehler bei der Produktion des Moduls

Lötbrücken: Würden zum Kurzschluß führen und das Teil schon bei der Endprüfung als defekt ausweisen

Lötfehler. Treten sehr selten auf da heute i.d.R. alle Lötungen im Lötbad oder auf Lötrobotern durchgeführt werden. Diese könne aber zu mangelndem Kontakt führen und würden dann bei der Endprüfung als defekt ausgewiesen.

Kontaktierungsprobleme. Die interne Schaltelektronik muß mit der Steckerleiste (externer Anschluß) verbunden werden. Bei Kontamination der Lötstellen/Bondstellen kann es zum Abriß der Verbindung kommen. Man unterscheidet zwischen Sofortausfällen (werden bei Endprüfung entdeckt) und Feldausfällen (fallen während des Betriebes aus). Letzterer Fall ist die eigentliche Ursache für Ausfälle von Modulen. Während der Garantiezeit sind sie durch den Hersteller abgesichert.

Bauteilfehler = Ausfall eines Bauteils. Insbesondere bei Verwendung von hochwertigen, selektierten Bauteilen ist diese Ausfallursache sehr gering. Auch hier unterscheidet man zwischen Sofortausfällen und Feldausfällen.

Sämtliche HÜCO Zündmodule werden nach neuesten Erkenntnissen entwickelt und dann in umfangreichen Tests auf ihre Robustheit hin untersucht. Dazu zählen Vibrationstests, Temperaturtests, Salzwassersprühstests, Schlagtests etc.. Nach Abschluss der Entwicklung und Produktion werden alle Teile vor Versand zu 100% endgeprüft. Somit ist gewährleistet, dass alle Geräte in Ordnung sind, wenn sie unser Lager verlassen.

Wir hoffen, dass Ihnen diese kurze Produktvorstellung einen kleinen Einblick in die Komplexität eines Zündmoduls gegeben hat. Sollten Sie weitere Fragen zu diesem Thema haben, wenden Sie sich bitte an uns. Wir werden Ihnen gerne weiterhelfen.

these parts. However there are always exceptions to the rule where module housings or plugs can be damaged causing the humidity to gain access to components causing failure. The older the vehicle gets, the more vibrations evolve from the engine also resulting in failures.

#### 4. Excessive Temperatures

Defective cooling system. The consequence of a failure or reduction in power of the cooling system can temporarily lead to excessive heat to the module, in addition to the normal ambient under-bonnet temperature, will reduce the normal life of the module.

Incorrect installation (heat flow). There are some modules, where it has to be observed that the heat conducting compound supplied with the module must be applied between the module and the heatsink (normally a metal plate). It optimises the heat flow, increasing the life of the ignition module.

Incorrect Location (external heat). The module could have been installed by the vehicle manufacturer in an inadequate place, ie close to the exhaust or may have been replaced by a mechanic to the wrong location during a service or repair.

#### 5. Other reasons for failures

Distributor

Transmitter

Modulator unit

Spark plugs

Ignition leads

It is extremely difficult to distinguish any of the above components with intermittent faults with that of a defective ignition module. All of these reasons can have the same characteristics as a faulty module. If any of these components are defective and the existing fault is not detected when a new module is fitted, this will almost certainly result in the destruction of the new module caused by the existing undetected fault.

#### 6. Possible Production Faults

Soldering tails: These would lead to a short-circuit and would be identified during final inspection.

Dry joints. These appear rarely today, because of „double wave“ soldering process or soldering robots, eradicating the probability of dry points

Contact problems. The internal switching electronics must be connected by an external connection plug. If there is contamination of this soldered connection an intermittent fault could develop. There is a difference between an immediate failure (detection during final examination) and a field failure (failure during operation). The latter is the most common cause of modules to fail. These failures are under guarantee during the warranty period given by us as the manufacturer.

Defect of components = failure of a selected component, used in the manufacture of our modules is extremely rare because of the high specification demanded from all our components suppliers.

All ignition modules produced by HÜCO are developed with the latest state of the art technology, with extensive life and field testing against original equipment perimeters. These tests involve vibration, temperature, salt water, impact etc.. In our final test all parts are verified 100% before dispatch. We guarantee all products are performing to specifications before leaving our stock.

We hope that this short product presentation gives you an insight into the complex structure of an ignition module. Should you have any further questions regarding this subject, please do not hesitate to contact us, we will be only too pleased to assist you.

# Produkt Informationen zu Zündmodulen und Luftmassenmesser

## Product Infos for Ignition Modules and Air Flow Meters

### Hüco Luftmassenmesser

Ein wichtiges Kriterium bei der Entwicklung eines KFZ ist die Einhaltung der gesetzlichen Abgasnormen. Zur Einhaltung dieser Abgasnormen ist es unter anderem notwendig, das genaue Verhältnis von Luftmasse zu Kraftstoffmenge zu ermitteln. Die Ermittlung der Luftmasse übernimmt der sogenannte „Luftmassenmesser“.

Er dient zur Messung des Luftmassenstromes bei Verbrennungsmotoren (z.B. Benzin- und Dieselmotoren) und gibt dem Motormanagement bzw. der Einspritzanlage über seine elektronischen Ausgangssignale entsprechende Werte vor. Diese Werte benötigt das Motormanagement zur genauen Bestimmung der Einspritzmenge, abhängig von der momentan benötigten Leistung, dem Luftdruck und der Lufttemperatur.

### Aufbau

Der eigentliche Sensor ist im Strömungskanal des Stecksensors integriert. Diese Stecksensoren eignen sich für den Einbau im Luftfilter, wie auch in sogenannte Messrohre, welche im KFZ anzutreffen sind. Ein elektronisches Messsystem wandelt die Daten des Sensors in entsprechende Messdaten für das Motormanagement / die Einspritzanlage um.

### Funktion

Das Funktionsprinzip basiert auf einer indirekten Messung des Luftstromes.

Ein Heizelement wird während des Betriebes bestromt und somit aufgeheizt. Die vorbeiströmende Luft verursacht nun ein Abkühlen des Heizelementes. Die so entzogene Wärme des Heizelementes gibt Aufschluss über die vorbeiströmende Luftmasse.

Je größer die Luftmasse, desto größer ist die Abkühlung des Heizelements bzw. die so entstehende Temperaturdifferenz.

Die im Stecksensor integrierte Elektronik wertet diese Daten aus und ermöglicht so eine genaue Ermittlung der durchströmenden Luftmenge.

### Defekt / Produkt minderer Qualität

Wie kann sich ein Defekt eines Luftmassenmessers im Fahrzeug auswirken und wie macht sich ein Luftmassenmesser mit „minderer Qualität“ bemerkbar?

- Genereller Leistungsverlust
- Punktueller Leistungsverlust
- Unruhiges Motorverhalten
- Erhöhter Kraftstoffverbrauch
- Schlechte Abgaswerte
- Ausfall des Katalysators
- Ausfall des Kraftfah

### Hüco Air Flow Meters

An important criterion for the development of an automobile is the compliance with the legal emission standards. In order to adhere to these emission standards it is, amongst other things, necessary to ascertain the exact relationship between the air mass to the fuel quantity. The ascertainment of the air mass is undertaken by the so-called "Air Flow Meters".

It is used to measure the air mass flow in combustion engines (e.g. petrol and diesel motors) and provides the motor management or the fuel-injection system with relevant values via its electronic output signals. These values are needed by the motor management in order to exactly define the injected fuel quantity, dependent on the currently needed performance, the air pressure and the air temperature.

### Assembly

The actual sensor is integrated in the flow channel of the pluggable sensor. These pluggable sensors are suitable for the installation in the air filter, as well as in so-called gauge tubes, which one can find in automobiles.

An electronic measuring system transforms the sensor data into corresponding measuring data for the motor management / the fuel-injection system.

### Function

The functional principle is based on an indirect measurement of the air current. A heating element is supplied with power during operation and thereby heated up. The on-rushing air now causes a cooling down of the heating element. The heat that is detracted from the heating element gives information about the on-rushing air mass. The larger the air mass, the larger the cooling down of the heating element is respectively the thereby created temperature difference.

The electronics that are integrated in the pluggable sensor analyzes this data and thereby allows for a precise ascertainment of the on-rushing air quantity.

### Defect / Product of sub-standard quality

What are the effects of a defective air mass flow meter for an automobile and how can one recognize an air mass flow meter of "sub-standard quality"?

- General performance loss
- Occasional performance loss
- Unsettled motor behaviour
- Heightened fuel consumption
- Bad emission values
- Malfunction of the catalytic converter
- Breakdown of the automobile

7 Anschlüsse; ersetzt auch Zündmodule mit 6 Anschlüssen.

7. Anschluß = Drehzahlmesser

\* ist nicht einsetzbar bei folgenden Motoren:

<b>Citroen</b>	XU 10 J2Z	Kat.
	DKZ	Kat.
<b>Peugeot</b>	XU 9 JAZ	Kat.
	XU 9 J4Z	Kat.

7 pins; also replaces ignition modules with 6 pins.

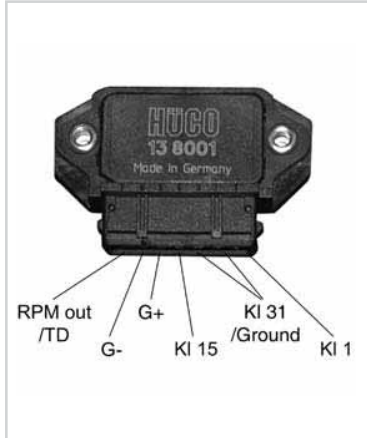

7th pin = revolution indicator

\* is not employable for the following engines:

<b>Citroen</b>	XU 10 J2Z	Kat.
	DKZ	Kat.
<b>Peugeot</b>	XU 9 JAZ	Kat.
	XU 9 J4Z	Kat.

**ARTIKEL / ARTICEL**

**WÄRMELEITPASTE**

zu verwenden bei der Montage von HÜCO Zündmodulen.  
Die silikonhaltige Wärmeleitpaste verbessert den Wärmeübergang und ist elektrisch nicht leitend.

Füllgewicht: 70g

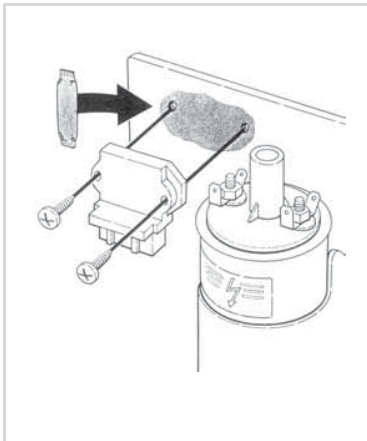

**HEAT CONDUCTING COMPOUND**

to be used for the mounting of HÜCO ignition modules.  
The heat conducting compound, containing silicon, improves the heat transfer and does not conduct electricity.

Expletive weight: 70g

**HÜCO-NO.**

138099

**MONTAGEANLEITUNG/ MOUNTING INSTRUCTIONS**

1. Vor Beginn der Montage Massekabel (-) von der Batterie abklemmen.
1. Before beginning work disconnect the earth cable (-) from the battery
2. Defektes Zündmodul vom Zündverteiler abschrauben
2. Remove the defective ignition module from the distributor
3. Modulkontaktplatte und Montagefläche mit wärmeleitender Paste (13 8099) bestreichen.
3. Coat module contact plate and mounting surface with heatconducting paste.
4. Zündmodul am Zündverteiler anschrauben (siehe Zeichnung). Empfohlene Drehkraft 1,0 - 1,5 Nm
4. Screw ignition module to distributor (see drawing). Recommended torque 1,0 - 1,5 Nm
5. Nach Abschluß der Montage Massekabel (-) wieder anklemmen
5. When mounting is complete reconnect earth cable (-).

## Drosselklappensensoren Throttle Position Sensors

### Grundlegende Eigenschaften

Drosselklappensensoren sind an der Drosselklappenachse befestigt und überwachen den Öffnungswinkel der Drosselklappe.

Aus den gewonnenen Informationen errechnet die Motorelektronik die Kraftstoffmenge, die in Abhängigkeit weiterer Faktoren (z.B. Motortemperatur, Luftdruck, Drehzahl) eingespritzt wird.

Drosselklappensensoren gibt es in verschiedenen Bauformen:

### Drosselklappenschalter

Im Drosselklappenschalter befinden sich zwei Schalter, die über eine Schaltkulisse betätigt werden.

Über die beiden Schalter erkennt die Motorelektronik die beiden Zustände Leerlauf und Vollast. (Leerlauf bei geschlossener Drosselklappe, Vollast bei einem festgelegten Öffnungswinkel).

Bei geschlossenem Volllastschalter wird die Einspritzmenge des Kraftstoffes erhöht.

### Drosselklappenpotentiometer

Beim Drosselklappenpotentiometer wird der Öffnungswinkel der Drosselklappe durch einen regelbaren Widerstand erfaßt. Da Öffnungswinkel und Widerstandswert in einem festen Verhältnis zueinander stehen, kann die Motorelektronik jederzeit den Winkel der Drosselklappe erkennen.

Außerdem wird die Winkelgeschwindigkeit (Zeit in der die Änderungen des Drosselklappenwinkels stattfinden) mit erfaßt.

Bei schneller Veränderung, z. B. wenn das Gaspedal schnell durchgetreten wird, spritzt die Motorelektronik mehr Kraftstoff ein.

### Mögliche Fehlfunktionen

Drosselklappensensoren reagieren auf jede Veränderung des Gaspedales und unterliegen damit einem mechanischen Verschleiß. Außerdem sind sie extrem empfindlich gegen Verschmutzung durch Ölfilme, Staub und Feuchtigkeit.

Gummidichtungen sollen dies zwar verhindern, doch durch die Einflüsse im Motorraum (Extreme Temperaturveränderungen, Vibrationen, Öle, Reinigungsmittel usw.) können Dichtungen spröde werden.

Dadurch können Drosselklappensensoren folgende Fehlfunktionen erzeugen:

Startschwierigkeiten des Motors.

Veränderungen der Drehzahl obwohl die Stellung des Gaspedales nicht verändert wird.

Erhöhter Kraftstoffverbrauch.

Stottern, Bocken des Motors bei Veränderung der Gaspedalstellung.

### Key characteristics

Throttle position sensors are connected to the throttle-valve spindle and control the angular aperture of the throttle valve.

The engine management system receives this information and calculates the fuel quantity to be injected taking into account factors such as the engine temperature, air pressure, rate of revolutions.

There are different types of throttle position sensors:

### Throttle Position Switches

Within the throttle position switch are located two switches that may be operated by a gear-shifting gate.

Via these two switches the engine management system detects if the engine is idling or under full load (idling in case of closed throttle valve, full load in case of a fixed angular aperture).

If the full load switch is closed the quantity of fuel injected is increased.

### Throttle Position Potentiometer

In this case the angular aperture of the throttle valve is detected by a variable resistance. As there is a fixed ratio between the angular aperture and the resistance value, the engine management system can detect at any time the angle of the throttle valve. Furthermore, the angular velocity (i.e. the time it takes the throttle valve to change its angle) is also registered. If the angle is changed quickly, e.g. if the accelerator is pressed sharply, more fuel is injected via the engine management system.

### Possible malfunctions

Throttle position sensors react to any change of the accelerator and thereby are subject to mechanical wear and tear. In addition, they are susceptible to contamination by oil film, dust and dampness.

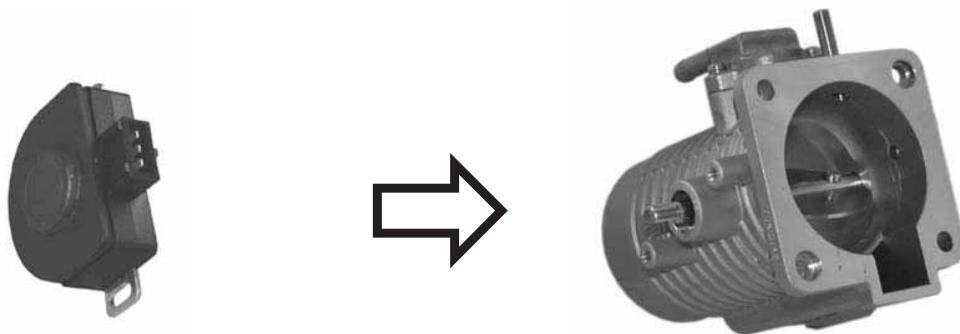

Rubber seals will minimise the risk of damages, but other factors within the engine compartment (extreme temperature variations, vibrations, oil, cleansing agents etc.) may cause the seals to become brittle. This following malfunctions may occur when using throttle position sensors:

Difficulty in starting the engine.

Change in the rate of revolutions, even though the setting of the accelerator has not changed.

Increased fuel consumption.

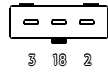

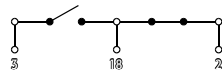

Spluttering of the engine if the setting of the accelerator has changed.
